Can the ProtectPro Smart Defender “SD 4” protect during Air travel?

Flying at high altitude exposes passengers to a combination of environmental influences that are not encountered at the same intensity on the ground.
At cruising altitude, passengers may be exposed simultaneously to:

- Electromagnetic Radiation (EMR) and Electromagnetic Fields (EMF)
- Magnetic Fields
- Cosmic Radiation

Exposure to cosmic radiation increases significantly with altitude, making it an additional consideration during air travel.

THE QUESTION and CHALLENGE:
Can the ProtectPro Smart Defender “SD 4” protect you from the harmful effects of Electromagnetic Radiation, Electromagnetic Fields & Cosmic Radiation?

The BESA Institute in Austria was comissioned to test the “SD 4” against the below listed parameters

Cosmic and Natural Radiation

Digitized Cosmic Radiation
Galactic Cosmic Radiation
Solar Cosmic Radiation
Secondary Particle Radiation
Neutron Radiation
Natural Terrestrial Radiation
Gamma Radiation from Natural Radionuclides
Radon Radiation (or relevant references thereto)
Natural Background Radiation

Selected Electromagnetic Fields

Low-Frequency Electric and Magnetic fields (digitized)
High-Frequency Electromagnetic Fields (digitized)
WLAN (technically generated)
Bluetooth (technically generated)
Mobile Communication (technically generated)

THE RESULTS
The following seven pages present the graphical results of the BESA Institute's evaluation of the ProtectPro Smart Defender “SD4”.
